So I wasn't going to do this but I think people need to see what not vaccinating their kids do to the OTHER kids like my 6 week old daughter. Isabelle has been in the PEDS ICU since she was 6 weeks old (now 10 weeks) with whooping cough. She was on a ventilator for 3 weeks and CPAP for 3 days and we're still facing another 2 months in the hospital. She has to learn how to eat all over again, she's going through major withdrawals from the morphine and sedative she was on when she was ventilated, do you know how hard it is to watch your 10 week old go through withdrawals??!! We were hours away from losing her, the nurse picked her up and ran her down the hall to the ICU to get her ventilated because we were losing her. What you do with your kids is your choice but do not tell me that not vaccinating your kids isn't hurting anyone but your own kids, Isabelle is proof that it harms other children who aren't old enough to get their vaccines yet. My son is vaccinated to protect himself and the other kids he's around. It never crossed my mind to not vaccinate, I want to protect my children and other children. Please vaccinate your kids, it's not fair that my little girl is in the PICU coughing and turning blue with alarms going off because she can't breath just because you didn't vaccinate your kids.

Please share so other people can see what happens when you don't vaccinate!
